REQUIREMENTS FILE

Password Strength Analyzer

Author: Harishankar AS

File name for the original submission: requirements.txt

Dependencies

No third-party Python packages are required. The project uses the built-in Python modules **re** and **getpass**.

Environment

Recommended Python version: 3.8 or newer.

Optional Notebook Environment

Install Jupyter only if you plan to open and run the .ipynb notebook. It is not required to run the standalone .py program.

Contents of requirements.txt

```
# Requirements for Password Strength Analyzer
# Author: Harishankar AS
#
# No third-party Python packages are required.
# The project uses modules included with Python:
# - re
# - getpass
#
# Recommended Python version: Python 3.8 or newer
#
# Optional, only if you want to run the notebook:
# jupyter
```
